INDEX TO ILLUSTRATIONS.

Allegheny Observatory, The New, Plate XXIV.....Op. 477
Asteroid 1911 MT, diagram of orbit..... 517
Bathymetric chart of the oceans..... 300
Boss, Lewis, Plate XXXII.....Op. 584
Brashear, John A..... 442
Clouds at the Lick Observatory, Plate III.....Op. 133
Comet 1852 IV (Westphal), diagram of region to be searched..... 184
1911 *c* (Brooks) Nov. 1, 1911, Plate XXXVI, *Alfred Rordame*....Op. 641
1911 *h* (Schaumasse) diagram of orbit..... 186
1912 *a* (Gale) diagram of apparent course..... 603
diagram of orbit..... 604
1912 *b* (Tuttle-Schaumasse), diagram of orbit..... 670
1912 *c* (Borrelly), diagram of orbit..... 671
Conjunction of Lutetia with Jupiter, diagram..... 608
of Mars with the Moon Jan. 28, 1912..... 188
Course of the Earth and Sun through space during twelve months..... 7
Dome for the 60-inch reflector..... 530
Eclipse of the Sun, April 17, 1912.....372, 373
diagrams 33, 170
Oct. 10, 1912, diagrams.....33, 499
Ferrel tide predicting machine..... 274
Geminids, December 11, 12, 13, 1912..... 66
Halley's comet, May 11, 1910, Plate XXXVI, *Alfred Rordame*.....Op. 641
Hyades group, The convergent and apices of motion..... 365
Imperial Observatory of Russia.....419, 421
Jupiter, 1911 May 17, 24 and July 19, Plate XI.....Op. 308
1912, Plate XXV, *Latimer J. Wilson*.....Op. 481
in July, August and September 1912, Plate XXVII,
Latimer J. Wilson.....Op. 545
Light curve of Z *Andromedae*..... 248
SS *Cygni* 321
Nova *Geminorum* No. 2.....312, 380, 449
Polaris 506
Mars, A Mercator's projection of, Plate I, *Latimer J. Wilson*.....Op. 65
Aug. 5, 1907, *Alfred Rordame*.....639, 640
Variation in the apparent size of, for the oppositions of 1901 to 1950... 331
Milky Way in *Scutum Sobieski*, Plate XXXVII, *Alfred Rordame*.....Op. 642
Movement of celestial pole around the pole of the ecliptic and the location of
the Sun's apex..... 5
Nebula, N. G. C. 1300, The Spiral, Plate XXXIV, *H. D. Curtis*,.....Op. 637
N. G. C. 5921, The Spiral, Plate XXXIV, *H. D. Curtis*.....Op. 637
N. G. C. 7293 in *Aquarius*, The Helical, Plate XXXV, *H. D. Curtis*
.....Op. 637

Nova *Geminorum* No. 2, Changes in the spectrum of, Plate VI, *J. A. Parkhurst*....Op. 237
Photographs of the region about, Plate VII, *H. C. Wilson*....Op. 244
Observatory at Moscow, Plate IV....Op. 200
Mr. Burbeck's....652, 653, 654
Occultation of Antares June 26, 1912, diagram.... 371
Mars, Jan. 1 and 28, 1912, charts.... 31
Venus April 15, 1912, diagram.... 169
Orionids, October 20, 1912.... 687
Path of the north pole of the Earth's axis.... 266
Perseids, August, 1912.... 618
Phases of the spectroscopic binary *β Aurigae*.... 447
Photographic charts of RY *Andromedae* and V *Lacertae*, Plate VIII....Op. 265
Photographs of star trails with an ordinary camera, Plate II *Bernard Thomas*....Op. 121
with a Goerz lens by *Charles Burckhalter*
Plate XVII, The Little Dipper....Op. 424
Plate XVIII, The Big Dipper....Op. 424
Plate XIX, Ursa minor and Ursa major....Op. 424
Plate XX, Orion....Op. 426
Plate XXI, Cygnus....Op. 426
Plate XXII, Sirius, Orion and Pleiades....Op. 426
Plate XXIII, Polar star trails....Op. 426
Planetary accelerating machine.... 21
revolving machine.... 23
Pleiades, Plate XXXVII, *Alfred Rordame*....Op. 642
Poincaré, M. Henri, Plate XXXIII....Op. 621
Saturn, Sept. 4, 1912, *A. Rordame*.... 638
Saturn's rings.... 27
Scheiner's helioscope.... 565
first equatorial telescope.... 566
Sense perception of star distance, Plate V....Op. 221
Solar halos seen at Williams Bay, Wis., Nov. 3, 1911.... 2
prominences, Calcium spectroheliograms,
Plate XIV, *Frederick Slocum*....Op. 409
Plate XV, *Frederick Slocum*....Op. 412
Spectrum of b^2 Cygni 1911, June 21, and P Cygni 1911, July 3, Plate XXVIII....Op. 548
Star velocities about the solar apex.... 434
about the solar antapex.... 435
Stars, Average distances of the brighter.... 439
Sunspot, A great, Plate XXVI, *Alfred Rordame*....Op. 498
group, Calcium spectroheliogram, Plate XVI, *Frederick Slocum* Op. 414
System of S *Cancri*.... 575
U *Cephei*.... 577
UW *Cygni*.... 577
WW *Cygni*.... 577
W *Delphini*.... 576
U *Pegasi*.... 578

Telescope, the 5-inch equatorial of the Creighton University Observatory, Plate XXIX ..... Op. 553
Plate XXX ..... Op. 556
Plate XXXI ..... Op. 561
Telescopes made by amateurs 187
The 100-inch disk on the grinding machine, ready for polishing, Plate XII Op. 333
Tower telescopes 529
Turret telescope, interior of Mr. Hartness' observatory, Plate XIII ..... Op. 337
as seen from the northeast 339
looking west 340
looking northeast in winter 341
U. S. Coast and geodetic tide predicting machine No. 2, Plate IX ..... Op. 270
height side, Plate X ..... Op. 276
driving crank 278
dial case 280
Velocity curve of θ^2 *Tauri* 681
β *Scorpionis* ..... Op. 686

GENERAL INDEX TO VOLUME XX.

Aberration, The constant of 617
Adjustment of a reflecting telescope 530
Aitken, R. G., Note on the binary systems OΣ536 and OΣ341 643
Allegheny Observatory, Dedication of the new 533
Almanacs, International conference on nautical 129
Alpha Aquilae, *Charles Nevers Holmes* 429
American association of variable star observers, monthly report .....
.....58, 125, 189, 257, 323, 394, 466, 518, 609
An appeal to the friends of astronomy, *Annie J. Cannon* 91
Apple, A. Thos. G., Jupiter and ω Ophiuchi 524
Arcturus of Bootes, *Charles Nevers Holmes* 238
Argelander, Fr., The variable stars, translated from the German by .....
Annie J. Cannon 91, 148, 207
Asteroid, An interesting 57
notes, *Ruel W. Roberts* 119
problem, The, *Joel H. Metcalf* 201
Asteroids, Photometric observations of 194
1909 JA (Ekard), Ephemeris 252
1911 MT 464, 465, 665
diagram of orbit 517
elements 391, 517
Numbering of recently discovered 667
Astral disks and colored stars, *Edward Gray* 358
Astronomical phenomena in 1912 32
and Astrophysical Society of America, Washington meeting .. 131
Pittsburgh meeting .. 538
papers at the Washington meeting of the A.A.S.A 198
society, The Cincinnati 50
Astronomy, A pedagogical suggestion for teachers of, *Sarah F. Whiting* 156
as recreation, *Alfred Rordame* 638
in Pittsburgh, dedication of the new Allegheny Observatory 477
Aurora, Audibility of the 54
Baird, George M. P., A tribute to John A. Brashear 442
Baldwin, Florence L., Flamsteed's numbers and Bayer's Greek letters 82
Translation of Laplace's exposition du système du
monde (Livre 2 Chap. IX) 368
Barnard, E. E., Borrelly's comet 1912 *c* 672
Gale's comet 1912 *a* 579
Schaumasse's comet 608
Bible astronomy, *S. C. Hunter* 285
Binary systems OΣ536 and OΣ341, *R. G. Aitken* 643
Bond, Wm. C., A brilliant meteor 124
Boss, Lewis, Recent researches as to the systematic motions of the stars
(abstract) 217
Boss, Lewis, *R. H. Tucker* 581

Bouton, Tilton C. H., An inexpensive but valuable device for the amateur in star observation 355
Lower limit of magnifying power..... 326
Bowen, Robert H., Observations of Uranus..... 525
Brashear, John A., A tribute to, *George M. P. Baird*..... 442
Brilliant night ahead, *Frederic Campbell*..... 634
Brooks, William R., Gale's comet..... 606
Independent discovery of comet 1912 *b*..... 607
Bruseth, Nels, Motion in a resisting medium..... 51
Brush, Judson W., Magnetic disturbance March 1, 1912..... 254
Mars and the moon Dec. 4, 1911..... 120
Mock moons 123
Occultation of Antares..... 466
Burbeck, Allan B., An amateur's observatory..... 652
Occultation of Antares..... 465
Burckhalter, Charles, On some educational stellar photography..... 424
Calendar, The reform of the, *Ralph E. Wilson*..... 232
Campbell, Frederic, A brilliant night ahead..... 634
Sense perception of star distance..... 220
Solar and lunar declination..... 11
Cannon, Annie J., An appeal to the friends of astronomy..... 91
The variable stars, *Fr. Argelander* (translation)...91, 148, 207
Canopus 252
Capture theory, A question on the, *N. W. Mumford*..... 228
and capture practice, *F. R. Moulton*..... 67
Carothers, W. F., On the nature and origin of sunspots..... 290
Cassell, W. H., A bright meteor..... 673
Gale's comet 609
Occultation of Antares..... 253
Cincinnati astronomical society 50
observatory, The opening of the Mitchel building of..... 681
Comet, Encke, Elements of..... 57
Ephemeris at aphelion, *F. E. Seagrave*.....667, 668
New elements of, *F. E. Seagrave*..... 390
Halley, The latest observations of..... 63
Holmes' periodic, Return in 1912..... 465
Ephemeris 518
To a 544
1852 IV (Westphal), search ephemerides..... 182
1905 II (Borrelly)..... 49
1911 a, Wolf's periodic, elements and ephemeris..... 117
1911 c, (Brooks), ephemeris..... 118
George F. Nolte..... 122
1911 e, (Borrelly).....57, 123
ephemeris 184
1911 f (Quenisset), ephemeris.....119, 185, 251
new elements 252
1911 g (Beljawsky)..... 50
ephemeris 119, 185

Comet 1911 h, (Schaumasse) 56
diagram of orbit 186
elements 185
ephemeris 57, 119
1912 a, (Gale), Discovery 516
diagram of orbit 605
E. E. Barnard 579
elements and ephemeris 603, 604, 605
ephemeris 669
Notes, *Bernard Thomas* 668
spectrum, *J. A. Parkhurst* 605
1912 *b* (Schaumasse-Brooks-Tuttle) 606, 607, 608, 609, 669
diagram of orbit 670
1912 c (Borrelly) 670, 672
conjunction with a faint star 672
diagram of orbit 671
elements 671
ephemeris 672
Conference, International, on nautical almanacs 129
Cosmogony, Review of Poincaré's lectures on, *T. J. J. See* 13
